Subject: re: exhibits for Water conference

Hi Cindy

I missed the deadline for the Water conference in October.

I work with the Agricultural Wood Producers Association centered in Ontario. This is an organized group of folks growing hybrid poplar for sawlogs in thirteen Idaho and Oregon counties. We also have a phytoremediation project and some folks are using the trees for windbreaks and riparian rehab.

We would like to have a professional display at this conference to promote agroforestry as a crop and to also use the trees to help with nutrient management in soils as well as carbon sequestration in the air.

How do we go about reserving a space at this conference?

If you would prefer a presentation, I could also do that.

Thanks for your help.
